

Environmental Protection Agency

2024 Environmental Compliance Calendar

for Dry Cleaners

Dear Dry Cleaning Business Operator:

Dry cleaners provide a valuable service. Because perchloroethylene (PERC) is used as a cleaning solvent, dry cleaning businesses generate hazardous waste, air emissions and wastewater and must comply with Ohio EPA's regulations.

Ohio EPA's Division of Environmental and Financial Assistance/Office of Compliance Assistance and Pollution Prevention (OCAPP) created this calendar to help you comply with the federal and state air pollution regulations that apply to PERC dry cleaners. The calendar is a companion to OCAPP's *Environmental Compliance Guide for Ohio Dry Cleaners*. For more publications and compliance resources, visit OCAPP's dry cleaning webpage.

OCAPP Webpage

DAPC Permitting

Does your shop have an Ohio EPA permit?

All dry cleaners using PERC need an air pollution permit from Ohio EPA. Your permit requires you to track PERC purchases and to maintain your machines to prevent PERC leaks. A simplified, general permit option is available for dry cleaners. You can download the permit application forms on DAPC's permitting page.

To get a permit, you will need to complete the following forms:

- Qualifying Criteria checklist;
- Permit-to-Install and Operate (PTIO) Application (NOTE: Read the General Permit Application Instructions first! It will list the questions you must complete and those you may skip.); and
- Emission Activity Category Form 3846 Dry Cleaning Facility.

This calendar is designed around your permit requirements and will help you:

- track PERC purchases and annual usage;
- record results of required leak checks and equipment monitoring;
- organize and document compliance in the event of an Ohio EPA inspection; and
- remember to submit your annual Permit Evaluation Report (PER)*.

*Ohio EPA will mail you the annual PER form approximately 45 days before it is due. You selected one of four possible due dates (**February 15, May 15, August 15 or November 15**) when you applied for your permit. The calendar includes a note on these four days as a reminder to check your permit for your PER due date.

The dry cleaning general permit requires you to retain records onsite for at least five years. We recommend you keep your completed 2024 calendar as a way to meet this requirement.

For questions about your air permit or Ohio EPA inspections, contact your local Ohio EPA district office or local air agency. To locate your local office, contact Ohio EPA's Division of Air Pollution Control at (614) 644-2270.

Ty XPSA

Are you checking your machines for leaks using a detector?

Federal regulations require that all PERC dry cleaners conduct monthly inspections for leaks using a

halogenated hydrocarbon detector or PERC gas analyzer. Dry cleaners may use any brand of halogenated hydrocarbon leak detector for the monthly leak check provided it is a "portable device capable of detecting PERC vapor concentrations of 25 parts per million by volume (ppmv) and indicating a concentration of 25 ppmv or greater by emitting an audible or visual signal that varies as the concentration changes." Facilities are required to repair any vapor leaks within 24 hours unless parts must be ordered. If you need parts, they must be ordered within two days of finding the leak and installed within five days of receiving parts. Dry cleaning machines installed before Dec. 21, 2005, had to begin using a detector immediately upon startup.

Leak Detector Options

Ask your suppliers about leak detection instruments. Based on information provided by the California Air Resources Board and leak detector manufacturers, the following units are expected to meet U.S. EPA guidelines. This is not an endorsement. Please note that this is not an extensive list. Further research is recommended to find the best leak detector for your dry cleaning facility. The price of leak detectors varies by manufacturer and model as well as the supplier from which the detector is purchased. The detectors listed in the table are priced between \$100 and \$800.

Getting Started

- 1. Please read the <u>Directions for Ohio EPA Compliance</u>
 Records located at the back of the calendar. Each month has a chart for recording the weekly and monthly checks required by your air permit. If you need to double-check how to complete any records after hanging the calendar, you can easily flip back to the directions without removing it from the wall.
- Complete the <u>2023 Solvent Purchase Summary</u> located on the inside back cover using last year's PERC purchase receipts or other records. You will need the total amount of PERC purchased during each month of 2023 for accurate tracking of your 12-month running total.

Getting Help

For help completing the calendar, contact OCAPP toll-free at (800) 329-7518. If you are considering changing to an alternative dry cleaning solvent, contact OCAPP to determine if you need an air permit or if you qualify for an exemption. OCAPP is an independent, non-regulatory office within Ohio EPA's Division of Environmental and Financial Assistance that offers **FREE** assistance to small businesses that need help complying with environmental regulations.

We hope you find this calendar helpful.

Sincerely,

The Office of Compliance Assistance and Pollution Prevention

Directions for Ohio EPA Compliance Records Section A

Directions for Ohio EPA Compliance Records Section B

Once each week, record the high and low pressure

- Any temperature-measuring device must be designed to measure a temperature of 7.2 °C (45 °F) to an accuracy of ± 1.1 °C (± 2 °F).
- A Halogenated Hydrocarbon Detector (HHD) or a PERC Gas Analyzer must be capable of detecting vapor concentrations of PERC of 25 parts per million by volume (25 ppmv).
- Colorimetric detector tubes must accurately register 100 ppm to an accuracy of ±25 ppm.

Directions for Ohio EPA Compliance Records Sections C and D

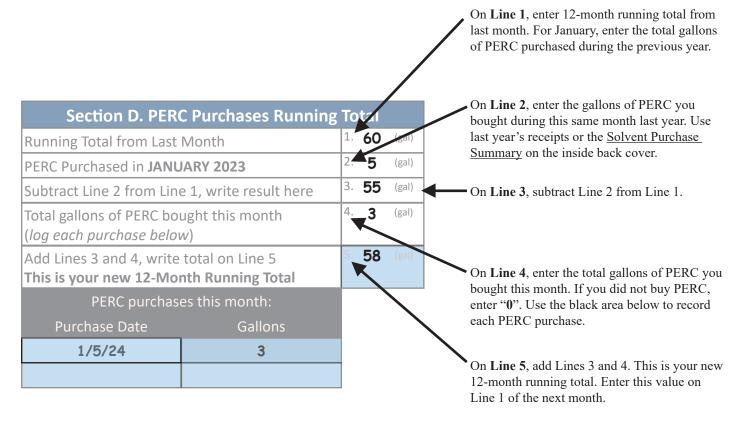

All containers used to store PERC or PERC-containing wastes (spent filter cartridges, muck, lint trap waste, etc.) must be sealed and in good condition.

Each week, visually check all waste containers to make sure they comply with these requirements. Log the results in the table: Y = yes (compliant); N = no (non-compliant).

NOTE: The 12-month running total is this month's purchases plus all the purchases during the last 11 months.

For instance, to calculate the 12-month running total for January 2024, add all purchases from February 2023 through the end of January 2024. A new 12-month running total should be calculated on the first day of each month.

2023 Solvent Purchase Summary

In order to conveniently deduct usage by month for 2024 running 12-month totals, record past 2023 usage by month here to use in this calendar.
