Final Perc Rule Change!

In December 2024, the US Environmental Protection Agency (EPA) set a 10-year phaseout for the use of PCE in dry cleaning to eliminate the risk to people who work or spend considerable time at dry cleaning facilities. Use of PCE in newly acquired dry-cleaning machines is prohibited after 6 months. The phaseout timeline differs for newer and older machines. For more information, check out EPA's final rule: <https://www.epa.gov/assessing-and-managing-chemicals-under-tsca/risk-management-perchloroethylene->

Pollution Prevention Guidelines

- Close machine doors immediately after transferring articles to or from the machines.
- Keep machine doors closed between transfers.
- Follow the manufacturer's instructions for operating and maintaining machines and equipment.
- Drain cartridge filters in a closed container for at least 24 hours before disposing.
- Store all perc and wastes in sealed containers that do not leak.
- Inspect all dry cleaning equipment daily for any leaks that are obvious by sight, smell or touch. Leaks include instances where drops of perc are visible on the outside of a machine or where air can be felt coming from a machine. (Large area sources and major sources must be inspected weekly). Dry cleaning equipment includes hoses, pipes, fittings, couplings, valves, gaskets, seals, pumps, solvent tanks, and containers, water separators, muck cookers, stills, diverter valves and cartridge filters housing.
- Repair any leaks within 24 hours or, if parts must be ordered to complete the repair they must be ordered within 2 working days of detecting the leak. Repairs must be completed within 5 days of receiving the parts.
- Keep copies of design specifications and operating manuals for each dry cleaning machine.
- Manage all solvent wastes that are hazardous waste, including filters, still bottoms, wastewater, wastewater treatment unit filters, lint, and button trap clean out. These must be sent off-site for proper hazardous waste disposal. Or in the case of wastewaters, may be managed in a wastewater evaporator treatment unit.
- Keep all containers with perc wastes (including the wastewater bucket) closed at all times. The containers must be labeled with the words "Hazardous Waste" and the date you first put waste in the container.

Recordkeeping Instructions

January 2025

Perc Purchases Running Total
(in gallons)

Total from Last Month December 2024		55
Subtract Perc Purchased January 2024		- 10
Subtotal		45
Purchase Date	Purchase Amount	12 Month Running Total
↑	+	
	+	

Enter 12 month running total from last month (December 2024).

Enter the amount of perc you bought during this month last year (2024), from last year's records or calendar. **Subtract that amount**

This is your 12 month running total if you do not buy any perc this month. Subtract last years perc purchases for this month. Example: January 2024, the perc purchased was 10 gallons, so 55-10=45.

This is your new 12 month running total if you bought perc this month. Record the bottom number in this column on next month's on the "Total from Last Month" Line. (February 2024).

Record the date you bought perc *this month*, if any.

If you bought perc this month (January 2025), record the amount and add it to the subtotal. This amount will also go on next year's calendar for this same month on the "Subtract Perc Purchased" line. If you bought none write in "0".

General

You may use this calendar to keep records required for air quality compliance. **Keep these records at your facility for 5 years.**

This calendar can be used to log the following required information:

- Perc purchases (gallons per month)
- Weekly refrigerated condenser outlet temperatures
- Weekly or biweekly leak inspections
- Leak repair activities
- Hazardous Waste generated.

The manufacturer's operation and maintenance manuals for all dry-cleaning equipment at your facility must also be kept on site.

Condenser Temperature Log

Check the outlet temperature of the refrigerated condenser every week. Record the temperature and date in the space provided. In the block marked "Temp less than or equal to 45°F?" Circle "Y" or "N" for "yes" or "no". If you checked "N", the machine must be repaired.

**Nevada
Business
Environmental
Program**

Assisting Nevada businesses since 1988

**(800) 882-3233
www.unrbep.org**

**(800) 240-7094
www.nevadasbdc.org**

The Nevada Business Environmental Program (BEP) provides free environmental management assistance. Our confidential third party assistance is delivered by experienced professionals that understand the challenges of operating a successful business. BEP services are designed to help businesses understand regulatory requirements, obtain permits, and develop cost-effective compliance strategies. The program provides information and advice about practical compliance approaches along with proven waste reducing technologies and techniques.

BEP is affiliated with the Nevada Small Business Development Center (SBDC) and receives funding support from the Nevada Division of Environmental Protection (NDEP). Additional support is provided by NV Energy.

The Nevada Small Business Development Center (SBDC) is a statewide resource for business assistance, providing a unique array of services, expertise and training in all areas including starting, growing, and sustaining a business. The Nevada SBDC guides and assists Nevadans looking to start and grow businesses, with objectives to increase business starts, create and retain jobs, and increase access to capital.
